The Network Bio-PAT

Industrial Biotechnology
Food technology
Medical biotechnology
Environmental technology
Bioenergy

CHARACTERISTICS

Cooperation network in the field of bio-analytics and bioprocess control for improved characterization of bioprocesses in the following industries:

AIM

Support of any cooperation between SME, research institutes, and major industrial enterprises with a focus on PAT in bioprocesses.

Increasing the product portfolio, visibility and innovation power of SME.

Interdisciplinary consortium:

- Sensor technology & bioprocess monitoring,
- Bioreactor design,
- (Micro-)electronics & IT

Development of analytical methods for improved bioprocess characterization in the fields of:

- Industrial biotechnology,
- Food technology/nutrition,
- Pharma/medical biotechnology,
- Environmental technology,
- Bioenergy

SERVICES

The network offers:

Support in:

- Building contacts between suppliers and applicants of PAT in bioprocesses,
- The preparation, coordination, and conduction of mutual research projects and marketing activities,
- The attendance at fairs, conferences, congresses,
- The organization of events (seminars, workshops, (mini-)symposia),
- The supply of materials for teaching courses in the field of PAT in bioprocesses (advising support).

Supply of a communication platform (intranet).
